About Me

Aspiring Game Developer with hands-on experience in Unreal Engine 4, Blueprint scripting, and C++. Passionate about creating gameplay systems, UI/HUD elements, and interactive game mechanics. Currently building game projects to strengthen technical skills and seeking internship or entry-level opportunities in game development.

Education

JS UNIVERSITY [2023 - 2026]
Bachelor of Computer Applications (BCA)

CERTIFICATIONS

- C++ Fundamentals – SoloLearn
- C++ Intermediate – SoloLearn
- Web Development Fundamentals – SoloLearn

Projects

Endless Runner Game (Solo Project)

- Developed an endless runner game using Unreal Engine 4.
- Implemented obstacle spawning and score tracking systems.
- Created custom UI/HUD elements.
- Added character switching functionality.
- Optimized gameplay performance.

Multiplayer Shooter Prototype

- Built a multiplayer shooter prototype in Unreal Engine.
- Implemented weapon attachment systems.
- Integrated animations and gameplay logic.
- Explored multiplayer networking concepts.

Tech Pack

- Unreal Engine
- Blueprint Scripting
- Gameplay Systems
- Animation Integration
- Character State Management
- UI/HUD Development
- Multiplayer Fundamentals
- C++
- HTML/CSS/JavaScript
